- Goal: To be upfront and authentic about the strengths and limitations of the course you have enrolled in
- This session is being **recorded**, will be shared on Uplevel within 24hrs along with slides; but if you're here, then please **make the time count**
 - We won't have an opportunity to repeat a lot of things mentioned today, at any other time in the programs!
- Your **microphone** will be **muted**
- Please do ask questions through the **Q&A** feature! We will address them as we go, or at the end

- **About AI Careers**
- **Overview of IK Programs**
- **Myths and Misconceptions**
- **Transformative GenAI and Agentic AI Course Details**
- **Q&A**

About AI Careers

Market Pay Signals & Expectations

The last 2 years have been brutal for global Big Tech hiring...

Every FAANG+ India office - Bengaluru, Hyderabad, Gurugram - has felt the impact of the global tech contraction.

660,000+

global tech jobs eliminated since Jan 2023 across FAANG, Big Tech & startups (cumulative)

Layoffs.fyi tracker, May '26

15,000

jobs Microsoft alone cut in FY25 - while spending \$88B on AI infrastructure

Yahoo Finance / TheStreet, '26

245,953

tech employees laid off globally in 2025 alone - Meta, Amazon, Google, Salesforce all in the cut list

TrueUp / Layoffs.fyi, 2026

Meta has just announced a further 8,000 layoffs for May 2026 (10% of workforce) - and ~42% of 2026 cuts are restructuring to redirect spend toward AI projects.

2026 is seeing a sharp resurgence - but the jobs coming back are AI-shaped.

The hiring engine has restarted globally, and India is where the AI talent demand is hottest.

+60%

**YoY surge in AI hiring in India in 2026 -
sharpest acceleration of any major
market**

LinkedIn AI Labor Market Report 2026

+40%

**India hiring momentum in 2026 - vs flat
(or shrinking) advanced economies**

LinkedIn / WEF, Jan '26

+92%

**jump in AI role postings globally - even
as overall tech hiring stayed muted**

LinkedIn x HeroHunt AI Roles, '26

...and AI demand inside India is broad-based across product companies, FAANG GCCs, and unicorns.

3.8 Lakh

**AI roles projected in India for 2026 - a +32% YoY surge from
2.9 L in 2025**

foundit AI Jobs Report, Jan '26

11.7%

**of ALL Indian tech postings now explicitly require AI skills - up
from 8.2% a year ago**

Scaler x Glassdoor India, 2026

Demand has run ahead of supply - and FAANG+, GCCs, and unicorns are paying the premium to close it.

1 Million+

AI professionals India needs by 2026 -
current supply only ~4.2 lakh

NASSCOM AI Skills Report, 2026

51%

of AI/ML roles in India remain unfilled
today due to a critical skills gap

World Economic Forum, 2026

1 in 10

qualified engineers for every open
GenAI role in India today

Taggd India / NASSCOM, '26

Deloitte × NASSCOM:

India's AI talent demand will cross 1.25 million by 2027 - implying a 600K–800K gap and a wide-open premium window for AI-fluent professionals.

Industry signal:

Even India's IT services giants are pivoting - TCS now hires 'AI-natives,' Infosys committed 20,000 fresh AI-fluent hires in 2026. The shift is industry-wide.

Whether you're an SWE, ML engineer, Product Manager, Engineering Manager, or TPM - there's an AI lane built for you at FAANG India, GCCs, and unicorns.

#1

AI Engineer

Ranked the #1 fastest-growing job in Hyderabad and India overall - postings up 143% YoY globally. Core hires at Google, MSFT, Amazon, Meta India offices.

[LinkedIn Jobs on the Rise 2026 \(India\)](#)

1,300+

AI Product Manager

Open AI PM roles in India alone, with hiring doubling since Jan 2024. Top hirers: Google, Microsoft, Amazon, Flipkart, Razorpay, PhonePe.

[LinkedIn / Eleken AI PM Market, '26](#)

₹2.12 Cr

Engineering Manager (AI)

Median total comp for a Software Engineering Manager at Google India. Amazon SDM median: ₹1.39 Cr. AI-team EMs sit at the top of the band.

[Levels.fyi, April 2026](#)

Top 10

AI Consultant, TPM & Researcher

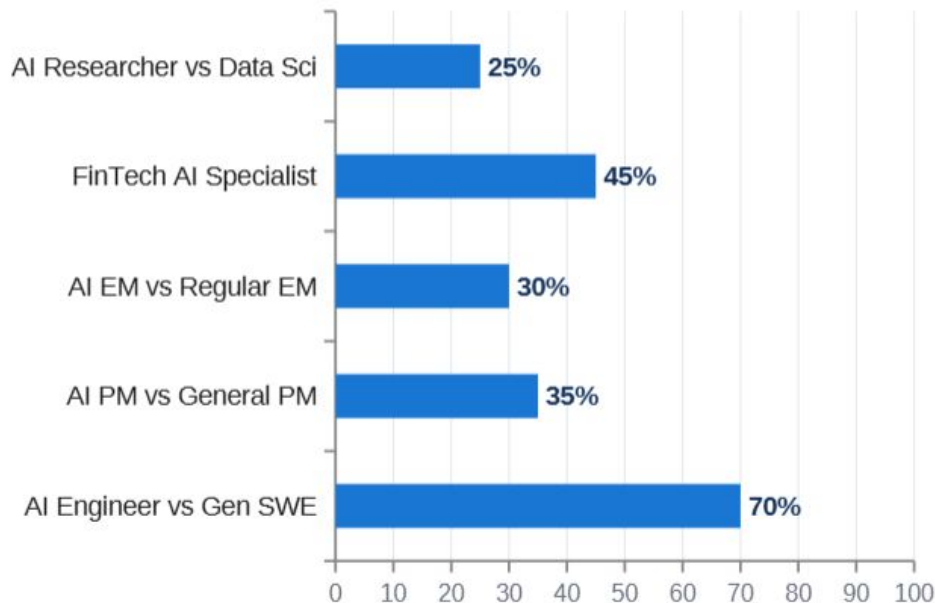

All three feature in LinkedIn's top 10 fastest-growing roles for 2026 - high demand at FAANG, GCCs, and AI-first unicorns for those who can orchestrate AI delivery at scale.

[LinkedIn Jobs on the Rise 2026](#)

AI fluency is a baseline expectation across the IC → Product → Management spectrum at FAANG+ India.

AI-specialized roles command a clear premium across every level - from IC to leadership - at FAANG, big-tech GCCs, and Indian unicorns.

AI Specialist Premium (%) vs Non-AI Peers — FAANG+ India

Role (Mid–Sr)	FAANG / Big Tech	Unicorns
AI Engineer (incl. GenAI)	₹35–130 LPA	₹25–80 LPA
AI Product Manager	₹30–80 LPA	₹25–55 LPA
Senior PM (AI)	₹60 L–1.2 Cr	₹40–70 LPA
Engineering Mgr (AI)	₹1.0–2.1 Cr	₹50–90 LPA
Director / Principal	₹2.0–3.0 Cr+	₹1.0–2.0 Cr

Overview of IK Programs

What do we offer & Who is it for?

UPLEVELING

- Switch to a better company or higher scope in same domain/role.
- Example: Oracle → Google; Service company → Product company.
- IK program: **Interview Prep Lab (Interview Prep)**

PROMOTION

- Move up within the same company/track.
- Example: TPM → Sr. TPM; Engineer → Sr. Engineer.
- IK program: **None (no dedicated promotion program)**

UPSKILLING

- Learn new tools/techniques for your current role.
- Example: Learning Gen AI & Agentic AI.
- IK program: **Transformative GenAI & Agentic AI**

RESKILLING

- Change domain and start fresh with new skills.
- Example: QA → Machine Learning Engineer; Ops → PM/TPM.
- IK program: **SwitchUp Programs**

TYPES OF CAREER GROWTH

Four ways professionals grow their careers

UPSKILLING

Learn new tools for your role
Example: Learning AI tools

PROMOTION

Move up in same company
Engineer → Sr. Engineer

UPLEVELING

Better company, higher scope
Oracle → Google

RESKILLING

Switch domain, start fresh
QA → Data Scientist

Goal	Course
You're looking to switch jobs in the next 6 to 12 months	Interview Prep Lab (Live)
You're looking to switch jobs very fast or study at your own pace with coaching	Self paced Interview Prep Lab
You want to build a portfolio of LLM based apps (aka GenAI and AgenticAI) AND wants to prepare for only AI related interview questions/rounds	Transformative GenAI and Agentic AI
You're looking to switch jobs in the next 6 to 12 months AND You want to build a portfolio of LLM based apps	Transformative GenAI and Agentic AI + Interview Prep Lab
You want to build a portfolio of LLM based apps AND You want to switch to being an ML Engineer in the next 18 - 24 months	SwitchUp

We will start with Transformative GenAI and Agentic AI, then move to interview prep.

PHASE 1 · RECOMMENDED START

Transformative GenAI and Agentic AI

Learn Agentic AI & GenAI from scratch.

- Build a portfolio of Applied AI projects for your resume
- Develop real-world AI engineering skills
- AI interview prep included (AI roles & AI-specific rounds)

PHASE 2 · COMES NEXT

Interview Prep Lab

- Aimed at preparing for tough interviews at Tier 1 companies **in your current domain** (Backend, Full-stack, ML, DS, DE, PM, TPM, EM...).
- NOT for switching into any new domain

Interview Prep Lab

Live classes

Self Paced

Self-paced + 1:1 / 1:N coaching

⚠ Tight timeline? Layoff, or an immediate job search - **reach out to the Student Success team** to start with Phase 2 (interview prep) instead.

Today, we'll focus on the Transformative GenAI and Agentic AI program.

**Before I go into details of
the Transformative Gen AI
and Agentic AI program,
let's bust some myths
about IK and learning in
general**

Busting some Myths & **Misconceptions**

Myth:

Just attending classes is enough, I don't need to do other things offered by the course

Reality:

Only attending classes will not get you to where you want to go.

Class, practice, reflection are all mandatory if you want to develop the skills required to succeed in interviews.

The program is *not* any more difficult than thriving at a tier 1 company, but is also not a walk in the park.

To do it well, it is going to consume a large portion of your weekly time.

Myth:

IK is still new and small

Reality:

Small or big is relative. We started in 2014. Here are our stats, as of 2026:

- **5000+ active students at any given time**
- **60+ concurrent live classes every week**
- **Hundreds of live sessions every week**
- **700+ instructors, 250 active every month**
- **25000+ alums**
- **Students in multiple timezones around the world**

Myth:

I am being taught 1:1 in the program.

OR

The course is entirely tailored to ME
and the companies I want to apply to.

Reality:

Full cohort

- Live Classes
- Interim Feedback Sessions

1:1 with others listening in

- 1:1 Coaching Sessions

1:1

- Mock Interviews
- Interview Readiness Session

Group sessions form a community which can be very powerful.

It is going to feel like a solo pursuit because we are remote.

Myth:

IK doesn't help with problems outside the curriculum.

Reality:

You don't need to go outside, but if you want to, we provide support for both the IK curriculum as well as outside needs

You can bring your own project during capstone phase and receive guidance on that

Myth:

I will be ready to interview at '<your favorite company>' in 2-3 months

Reality:

For a typical student, that is very very unlikely.

This will take time. It will likely take many months.

In order to build confidence, you will have to work tirelessly, non-stop.

You are starting a marathon, not a sprint.

If you need more time, please take it.

Myth:

**100%+ of IK students
succeed/100% fail.**

Reality:

Depends on the measure of success. If success is defined by getting a job in a tier1 company, then a minority succeed. But also, very few students define success that way.

Students come to IK with many different goals, priorities, experience and abilities. And there is no entrance test.

It is neither fair, nor feasible to measure and pressure everyone on a single outcome. %s and averages don't make sense in education (and health!) anyway.

The only thing ANY educational institute can do, is to show you a path and support you along the way, as you walk.

If you keep walking on this path to the tee, you will eventually succeed. That we know is 100%.

Myth:

I am taught by a single teacher, or in a single teaching style, or I can choose a teacher

Reality:

Recall, that our teachers are practitioners themselves holding a full-time job at a tier1 company.

For a given course, we have a common curriculum and common lesson plans across teacher, but not a single teacher.

Different teachers are good at and prefer to teach different topics.

While instructors follow the curriculum and lesson plan, they do that in their own style. Remember, that this is true for all education institutes. We just chose to be upfront about it.

Myth:

IK will help solve my take-home assignments before I submit

Reality:

Sorry, no. We won't cross that line.

Also, the company/person who gave you that assignment may be an IK supporter and we won't breach that trust.

Very happy to help you after you've submitted it.

Myth:

IK Programs focuses only on theory & concept building, not project work

Reality:

For hands-on building, our **Agentic AI** tracks include an end-to-end agentic AI projects. You'll learn different AI and Agentic AI tools and frameworks

Myth:

IK can create whatever additional content I want, and/or by any instructor of my choice

Reality:

Sorry, no.

We don't. We can't. Just not feasible operationally.

Myth:

Instructors/Interviewers will share the exact problems the companies ask in the interviews.

Reality:

Sorry, no. We won't cross that line.

Instructors, interviewers and IK staff choose to be bound by a code of ethics.

They will not reveal anything they deem confidential, at their discretion.

Myth:

Programs can be paused anytime, for any period.

Reality:

No.

Once started, programs and loan payments cannot be paused or put on hold.

Again, nothing against you. Indefinite pausing is an open-ended liability that no business in good standing can commit to.

The support period is very long for that reason.

Myth:

I can seek a refund if I don't use parts of the program.

Reality:

No

There are no refunds for unused portions of the program. Including Mock Interviews.

That's the business model of any educational institute, which keeps it affordable for everyone. Educational institutes knowingly provide a LOT of sessions and don't charge per session. You're welcome to use everything while you're a student.

Myth:

At IK, I am paying for education, or for getting an interview, or for a job.

Reality:

Education cannot be bought.

Nor can an interview or a job. Today, even content is free/cheap.

At a college or university, we pay for the credential and communal experience.

At IK, we are **paying for prioritization,** structure, community, curriculum, relevant advice, time saved, career communication, **motivation and headspace.**

Myth:

I need high IQ and/or strong pedigree to succeed.

Reality:

The only consistent correlation to success that we have found, is to how quickly you come back after you get derailed (high agency behavior).

There is also some luck involved in order to find the right opportunity at the right time.

IQ is correlated, but only at extreme ends

Let's now dive into the Transformative GenAI and Agentic AI course

Welcome to Interview Kickstart!

We are excited you are here and eager to dive in with you to uplevel your career. To kick things off, we have two items for you right now.

- Onboarding videos:** these 5 short videos (<20min) will give you an overview of UpLevel, our resource hub, and what to expect during the upcoming weeks of the technical program. Please watch them now. They are required before Orientation.
- Onboarding form:** this short form (10min) will help us get to know you better and help us set you up for success. Thanks in advance for providing as many details and specifics as you can. Please complete 24 hrs before your Orientation.

After you have completed these items, you are welcome to start the Foundational Material for your first topic. We will touch on this more in Orientation but feel free to get a head start.

Welcome to IK and let the journey begin!

Welcome to Interview Kickstart, Fannie!

We would love to get to know you better. This form will enable us to best support you thought this program. Please complete the below questions with as much detail as you can before Orientation. We read over all of these and will reach out if there are any questions/concerns on our end.

We look forward to meeting you in Orientation!

Discord is a **chat channel** for you to connect with other members of your cohort

- **Instructions + Invite enabled on Uplevel by end of this session**
- For announcements/ schedule updates
- Discord Uses:
 - Organize study groups & discuss questions
 - Share resources
 - Share obstacles and solutions

All 3 tracks cover the same core concepts - from simple to advanced agentic systems, including evaluation, deployment & fine tuning.

Pro Code

Heavy Coding · 17 weeks

Python-first stack. Prerequisite course provided if you know programming but not Python.

WHO IT'S FOR

- Backend / Frontend / Fullstack Engineers
- Test & Automation Engineers
- Android & iOS Engineers
- ML Engineers, Data Scientists

PREREQUISITES

Strong SWE fundamentals, comfortable coding

Low Code

Light Coding · 15 weeks

Blend of Python + low-code tools like n8n, LangFlow. Read code, don't need to master it.

WHO IT'S FOR

- Engineering Managers
- Embedded Systems Engineers
- Cloud Solutions Architects
- SREs, Cybersecurity & IT Pros

PREREQUISITES

Technical background, comfortable reading code

No Code

Zero Coding · 15 weeks

No Python at all. All agent building via Zapier, n8n, LangFlow & other no-code tools.

WHO IT'S FOR

- Technical Program Managers
- Product Managers (Tech)
- Data & Business Analysts

PREREQUISITES

No coding needed, comfortable with structured problem-solving

No prior AI/ML knowledge required for any track.

▶ Break - 5 minutes

*All three tracks cover the same curriculum end to end - your role decides how you engage with each topic. **Same destination.** The how changes - the what does not.*

Area	Pro code Track	Low Code Track	No Code Track
Main Focus	Building AI systems and agents	Leading AI engineering and architecture	Managing AI products and workflows
Coding Requirement	High	Medium	None
Technical Depth	Deep implementation-focused	Deep implementation-focused	Deep implementation-focused
Primary Skill Developed	AI engineering	AI technical leadership	AI product execution
RAG Coverage	Build and optimize RAG pipelines	Design scalable RAG architectures	Design scalable RAG architectures
Multi-Agent Systems	Implement orchestration logic	Architect scalable agent ecosystems	Define workflows and business use cases
Deployment	Strong production deployment focus	Deployment strategy and governance	Deployment strategy and governance
Evaluation	Debugging, tracing, optimization	Reliability, scalability, governance	Product KPIs and user outcomes
Tooling Style	Developer frameworks and APIs	Infra and orchestration platforms	No-code / workflow tools
Capstone Outcome	Production-ready AI application	AI platform / system architecture	AI product / workflow solution
Best Suited Roles	AI / ML Engineer, Agent Engineer	Engineering Manager, AI Architect	AI PM, TPM, Product Strategist

Execution-First, Not Theory-Heavy

Prioritizes building and debugging real systems in live sessions, unlike concept-heavy competitors.

Deep, Continuous Project Experience

Work on 6+ guided projects that evolve over time, mirroring real-world AI system iteration and production workflows.

Aligned to AI Hiring

Curriculum reflects the shift from GenAI to Applied AI to Agentic Systems-preparing learners for current hiring signals.

Curriculum
regularly updated
with latest AI
advancements

Agentic AI as a Core Skill

Agentic system design is a dedicated core phase covering planning, orchestration, evaluation, and production-grade patterns.

Agentic Interview Readiness

Train to articulate agentic decisions, trade-offs, evaluation strategies, and system design tested in AI interviews.

End-to-End Career Readiness

Integrates AI system building with traditional role-specific interview prep across SWE, MLE, PM, TPM, & EM tracks.

What this program is NOT for:

- Training large language models from raw data
- Designing new neural network architectures
- Research-oriented or math-heavy machine learning
- Large-scale distributed model training or optimization
- Competing with foundation model providers on model quality

This program teaches you how to **build intelligent systems using AI models**, not how to build the AI models themselves.

For Example, After completing this program, a backend engineer will be prepared to build AI-powered systems-but not to apply for model-training or ML research roles.

Forward Deployed Engineer, GenAI, Google Cloud

Google Bengaluru, Karnataka, India; Gurugram, Haryana, India; +1 more Early

Apply

Responsibilities

- Serve as the lead developer for complex AI applications, transitioning from rapid prototypes to production-grade agentic workflows (e.g., multi-agent systems, MCP servers) that drive measurable return on investment.
- Architect and code the "connective tissue" between Google's AI products and customer's live infrastructure, including APIs, legacy data silos, and security perimeters.
- Build high-performance evaluation (Eval) pipelines and observability frameworks to ensure agentic systems meet requirements for accuracy, safety, and latency.
- Identify repeatable field patterns and technical "friction points" in Google's AI stack, converting them into reusable modules or formal product feature requests for the Engineering teams.
- Co-build with customer engineering teams to instill Google-grade development best practices, ensuring long-term project success and high end-user adoption.

Staff Software Engineer, Google Play, Play Monetization

Google Bengaluru, Karnataka, India Advanced

Apply

Responsibilities

- Drive the design and implementation of Scalable and AI-first solutions, such as agentic promotions debugging and operations, P3 on-boarding experience, promotions life-cycle management.
- Lead cross-functional (xfn) alignment and collaboration with Games, Monetization (M10n), and Apps teams in Bengaluru to ensure a cohesive product and platform strategy.
- Mentor and coach engineers on the team, and fostering a culture of technical excellence.
- Partner with Product Management, Marketing, and other Engineering leaders to define the product roadmap and drive business outcomes.

Senior AI Solution Architect

Job ID: 3204037 | AWS India - Karnataka

Apply now

Key job responsibilities

- The AI Specialist SA team builds technical relationships with customers of all sizes and operate as their trusted advisor, ensuring they get the most out of the cloud at every stage of their journey while adopting GenAI/ML and Agentic technologies across their organisation.
- You'll manage the overall technical relationship between AWS and our customers, making recommendations on security, cost, performance, reliability and operational efficiency to accelerate their challenging GenAI/ML and Agentic projects.
- Internally, you will be the voice of the customer, sharing their needs with regard to their usage of our services impacting the roadmap of AWS GenAI/ML and Agentic features.
- In this role, your creativity will link technology to tangible solutions, with the opportunity to define cloud-native GenAI/ML and Agentic architectural patterns for a variety of use cases.
- You will participate in the creation and sharing of best practices, technical content and new reference architectures (e.g. white papers, code samples, blog posts) and evangelize and educate about running GenAI/ML and Agentic workloads on AWS technology (e.g. through workshops, user groups, meetups, public speaking, online videos or conferences).

Sr. Software Engineer, Alexa Connections

Job ID: 3180564 | ADCI MAA 15 SEZ

Apply now

Key job responsibilities

As part of our team, you will design and develop large-scale agentic AI systems that power Communications features on Alexa.

You will collaborate with cross-functional teams to understand a range of Agentic AI requirements and deliver solutions that ensure high data quality and availability. You will also contribute to evaluating and implementing new technologies to improve our Alexa systems and support team members through knowledge sharing and technical guidance.

Experience with full-stack development, distributed systems, agentic AI and machine learning will be valuable as you work across various layers of our technology stack to ensure end-to-end data excellence.

Sr. AI Platform Data Engineer, Amazon Autos

Job ID: 3156759 | ADCI - Haryana

Apply now

Key job responsibilities

Platform Development & AI Integration

- Build and maintain efficient, scalable data pipelines and curated datasets optimized for AI/ML consumption
- Implement systems for automated data classification to transform business problems into analytical solutions
- Develop AI-native self-service data platforms using an AI-first methodology
- Create AI-powered platforms with natural language interfaces for data access

Stakeholder Engagement & Delivery

- Serve as a technical partner to business stakeholders, data science teams, and cross-functional partners
- Deliver well-modeled, discoverable data optimized for specific use cases
- Design and build curated datasets using AI code generation and Agentic AI tools
- Communicate insights and recommendations to product, business, and technology partners

SDE II, AI Automation, Prime Video

Job ID: 10415078 | ADCI - Karnataka

Apply now

Key job responsibilities

Design, implement, and deploy high-quality, scalable, and reliable services for our automation platform.

Collaborate with other engineers, product managers, and applied scientists to deliver on our product roadmap and solve customer problems.

Utilize your problem-solving skills to tackle technical challenges in a large-scale distributed environment.

Participate in the full software development lifecycle, including design reviews, code reviews, and operational support, while adhering to engineering best practices.

Work backwards from business needs to build features and systems that directly impact our internal customers and improve efficiency.

This role offers a unique opportunity to shape the future of one of Amazon's most exciting businesses through the application of AI technologies. If you're passionate about leveraging AI to drive real-world impact at massive scale, we want to hear from you.

Sr. Technical Program Manager

Job ID: 10196802 | ADCI - Karnataka

Apply now

Key job responsibilities

Lead end-to-end delivery of high-impact AI/ML programs — taking Generative AI innovations from early research through production systems that serve hundreds of millions of customers, with direct ownership and accountability for outcomes.

Define program strategy, set measurable goals, and drive delivery independently in fast-moving, ambiguous environments where both the business problem and technical solution are still taking shape.

Apply strong technical judgment to challenge assumptions, simplify complex ML architectures, and ensure science and engineering teams are focused on solving the right problems in the right way.

Proactively identify and mitigate risks across the full research-to-production pipeline — including data quality, model performance, inference latency, and system scalability — before they become roadblocks to delivery.

Build alignment across Applied Scientists, ML Engineers, Software Engineers, Product Managers, and business stakeholders — driving crisp decisions, clearing blockers, and removing barriers that slow down research and production delivery.

Communicate program progress, research milestones, and complex trade-offs clearly and concisely to

Lead AI Engineer ✓

Bengaluru, Karnataka, India · 1 month ago · Over 100 people clicked apply
Responses managed off LinkedIn

Full-time

What You'll Build

- Build and operate a unified model gateway that abstracts provider complexity for product teams. Teams work with a clean interface; the platform handles routing, provider selection, and fallback logic under the hood
- Design and implement intelligent routing that matches each request to the right model based on task complexity, latency requirements, and cost targets. Not every call needs the same model
- Build resilience into the platform so provider outages, rate limits, and latency spikes are handled transparently. Agentic workflows stay up regardless of what happens upstream
- Own the observability layer across all AI-powered products: cost per call, latency distributions, token usage, and quality signals. Give product teams and leadership a clear view of how AI is performing and what it costs
- Build the infrastructure for safe model transitions: run new models alongside production, compare outputs, and roll

Principal Technical Program Manager, Ads Core AI Infra

Job ID: 10374777 | Amazon.com Services LLC

Apply now

Key job responsibilities

Key job responsibilities

- **Strategic Leadership:** Drive the end-to-end delivery of large-scale agentic AI programs, ensuring alignment with Amazon Advertising's long-term business and technical goals.
- **Stakeholder Influence:** Partner with leaders, stakeholders, and internal agent builder teams to align on priorities, drive consensus, and deliver impactful agentic core infra solutions that scale globally.
- **Solution Architecture:** Collaborate with engineering, product from agent and skill builder teams to onboard and

Apply

Save

Responsibilities

- As a Product Manager, you will evaluate global business requirements and architect solutions to be solved with systems and tools
- Identify, propose, and craft technical solutions that are user-friendly, scalable, and address key business issues
- Analyze legacy systems and interfaces and collaborate with software developers and business teams to design new and advanced cross-platform solutions
- Identify opportunities with existing offerings and drive initiatives to optimize the same
- Drive end to end design, implementation, improvements, maintenance, and training for software solutions
- Apply AI and GenAI tools strategically and effectively for day-to-day work as well as for our user solutions. Demonstrate not just awareness of AI, but proven judgment in knowing where AI accelerates outcomes and where it does not
- Partner with cross functional teams and act as liaison between technical teams and business partners
- Communicate project status, blockers, insights, trade-offs to stakeholders and leadership with clarity and precision

Google Review

Name: Aravind Ganesan

Rating: 5

Review: I took the TPM course and I liked it very much. I was new to AI, as a manager I just needed to know just enough technical knowledge regarding Agentic AI but I ended up learning a lot more than just anticipated. Classes were conducted very professionally. Teachers were very knowledgeable, friendly and patient. Loved the course.

Google Review

Name: Arun Sundaramoorthy

Rating: 5

Review: I have 18 yrs for experience in software engineering. I wanted to learn Agentic AI and found Interview Kickstart is the best in the industry for tutoring.

The program i joined is awesome, i got the best instructors. I would have taken months to self learn agentic ai, but with IK within few weeks i was able to build agents on my own.

Thanks to support team as well, they resolve all requests within a day

First:

Learning phase

- Structured, inflexible
- Live classes
- Homework
- Tests

Then:

Job Search phase (support period)

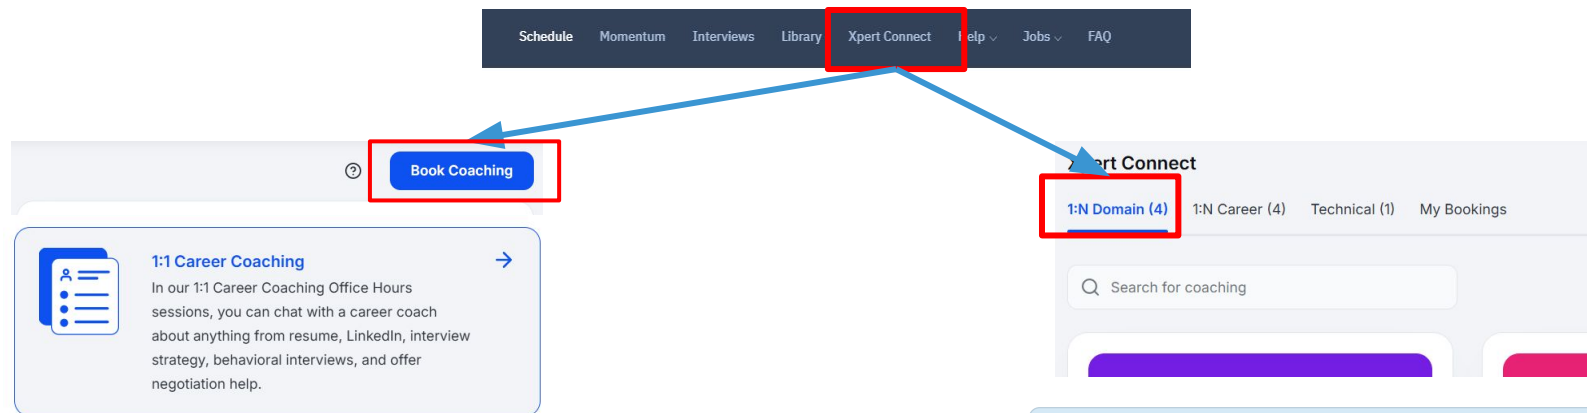

- Light, flexible structure
- Continued practice
- Mock interviews
- Applications

Day	Time	Activity
Sunday	9 AM - 1 PM IST	- Live Project Building Labs with Engineers, HMs, TL, Live Discussions - Deep Dives into each topic, Hands-on Project Building
Wednesday	8 PM - 9 PM IST	- Live AMA/ Doubt-clearing - FAANG/Top Company TLs, HMs & Other Experts as Mentors, - Domain and Industry Specific Guidance
Saturday	9 AM - 11 AM IST	- Assignments/Case Study Discussions, - FAANG/Top Company TLs, HMs & Other Experts as Mentors,
All week	Whenever you get time and headspace	- Foundational videos and homework

- It's 6 months, after your final class (as per your original schedule)
 - That's a LONG time
- Support period is used to
 - Finish everything that you were not able to get to, during the structured phase
 - Continue to attend technical and career coaching sessions
 - Continue to take mock interviews
 - Continue to contribute on Discord channel
 - Start interviewing with your practice/burner/tier 2 companies
 - Once you feel confident, start with your favorite companies

Coaching Support

Coaching Support : A Parallel Stream Of Classes

Career Coaching (1:1)

- Career advice from recruiters at top companies
- Supplements Career Skills Classes
- Unlimited usage with one session booked at a time

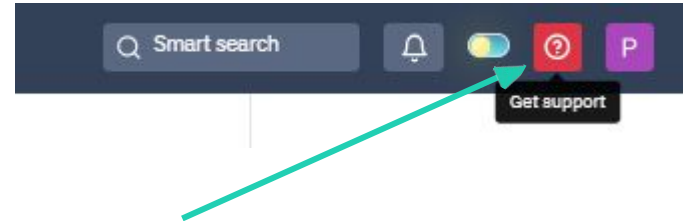

Domain Technical Coaching (1:N)

- Support for assignments and AI-related questions
- Help with doubt resolution or project queries or any extra help
- Every week throughout the program

- You get to decide when & how often for career coaching sessions
- Domain Technical coaching sessions are scheduled once every week
- With this flexibility comes responsibility
 - ✓ If you're struggling, reach out
 - ✓ Sign up for a coaching session (or connect with your peers)
- Coaches as support not saviors
 - ✓ We will not do the work for you
 - ✓ We will not give you "the answer", even for technical questions
 - ✓ We will work with you to help you find your way forward

Student Success Advocates (SSAs)

- Help with everything outside technical & career:
 - Time Management
 - Study Skills
 - Motivation
 - Other operational concerns including payment options and loan partners
- Available 7 days/week, from 9 AM to 8 PM IST
- Accessible through “**Get Support**” feature on **UpLevel**.

How our Placement Support Team Works for You:

- **Build Partnerships that Matter**
Collaborate with leading tech companies and recruiters who value IK talent.
- **Leverage Networks that Open Doors**
Tap into IK's alumni and recruiter community for referrals, mentorship, and inside access.
- **Surface the Right Opportunities**
Share select job openings aligned to your skills and career track.

Our role is to expand your access and visibility through partnerships, networks, and curated opportunities — so you're never alone in your job search journey.

Performance based referrals

- Performance conditions
 - Min 80% attendance in classes and tests, wherever applicable
 - DS/Algos
 - Systems Design
 - Domain
 - Transformative GenAI
 - Career Skills
 - Complete a minimum 80% of the associated foundations and problems/assignment.
 - Complete at least 3 mock interviews, each with a minimum performance rating of “3”. At least 2 out of these 3 interviews should be on technical topics. At most 1 behavioural or leadership interview will be counted here

*Placement Support
is only for Interview
Prep Learners*

Mock Interviews

Simulate a real interview and get detailed, personalized feedback

HOW IT WORKS

- 1:1 sessions
60 minutes, one mentor, one candidate
- FAANG+ mentors
Exclusively by Industry experts from FAANG+
- Real-time practice
Live simulation with structured evaluation
- Detailed feedback
Written report after every session
- Self-scheduled
Book topics whenever you're ready

MOCKS BY PROGRAM

5 mocks

**Transformative
GenAI and Agentic AI**

20 mocks

**Transformative
GenAI and Agentic AI
+ Interview Prep Lab**
(all tracks)

15 mocks

**Transformative
GenAI and Agentic AI
+ Self paced
Interview prep**
(all tracks)

Select Topic

Schedule Interview →

BOOKING RULES

- ✓ Schedule for one or more topics at a time
- ✓ Best done closer to your job search
- ✗ Cannot be company-specific
- ✗ Cannot be role-specific

Feedback form

Pro tip: Mock interviews can be converted into mentoring sessions.

▶ For Real Interviews

Featured in:

- You will have a CTM - Career Transformation Manager assigned to you AFTER your classes are over
- Once we enter the job-search phase, CTM starts helping you making your resume, strategizing, shortlisting companies, helping you search, sending you job that match, helping you apply etc.
- If you are desperately looking, you can start early with us, but that will take your attention away from prep
- Keep your CTM in the loop
 - Once you get an real interview
 - Once you finish a real interview
- Do some mock interviews before real interviews
- Do a debrief call with your CTM after every interview to get more personalized support

Why should IK's method work for you?

Structured Curriculum

- Hands-on with LangGraph, orchestration, and APIs
- Design, ship, and optimize multi-agent AI systems
- Updated content reflecting current hiring and AI trends

Active Community

- Study groups with candidates at similar preparation stages
- Peer code reviews and mock interview partnerships
- Built-in accountability systems for sustained momentum

Industry Experts

- Specific, actionable feedback-not generic advice
- Multiple specialized instructors per technical domain
- Real interview experience from MAANG+ companies

Comprehensive Support

- Mock interviews, 1-on-1 coaching, and domain specific coaching
- Templates, practice problems, and career skills
- Fast response times with clear escalation paths

This will not always be easy,

... but please trust the process...

... You are in good hands,

... AND we're all in this together!

- Practitioner Instructors, coaches, mock interviewers
 - Technical clarity
- + SSA: Student Success Advocate
 - Time management, motivation, study skills
- + CTM: Career Transformation Manager
 - Interview Debriefs, Resume, LinkedIn, Positioning, Job Searches
- + Curriculum development team
- + Operations team
- + Executives and Founders

Thank You!
