

CalendarMate — Capstone Screenshot Evidence

Mahesh P Zade

Submission evidence package | All screenshots retained from the supplied source document

Screenshot Requirements Covered

- Trace Overview List — recent Langfuse runs showing consistent logging.
- Successful Tool Call Trace — Scheduler execution with create_event/tool activity visible.
- Metrics & Token Usage — latency, token usage and cost information inside trace details.
- System in Action — Langflow canvas showing the implemented workflow.
- Langflow Playground — successful interaction evidence for the implemented agents.
- Architecture / Routing Evidence — Router/Dispatcher and specialist-agent wiring.
- Baseline Evaluation Evidence — screenshots supporting the required test scenarios.

Evidence inventory: 51 screenshot occurrences retained. No screenshots were intentionally removed from the supplied document.

Tracing

Waiting for first trace

Time to log your first trace, it only takes a minute

Get your API keys first, then ask your coding agent to add observability with Langfuse to your application.

1

Create API keys

Your application needs API keys to send traces to Langfuse.

Create new API keyManage API keys

2

Add tracing with your coding agentRecommended

Paste this prompt into Claude, Cursor, Copilot, or another coding agent.

Install the Langfuse AI skill from github.com/langfuse/skills and use it to add tracing to this application with Langfuse following best practices.

Copy prompt

or follow our docs to set up tracing manually

3

Run your app — traces will appear here

Once your app makes an LLM call, traces show up within seconds.

Requirement: Langfuse — Trace Evidence

It seems there was an issue retrieving your recent unread emails. Would you like me to check your unread emails generally, or do you want to specify a different query?

User

Draft a follow-up email regarding the pending action items from last week's project review meeting."

AI

✓ Finished in

756 | 4.0s

Here's a draft for your follow-up email regarding the pending action items from last week's project review meeting:

Subject: Follow-Up on Action Items from Last Week's Project Review Meeting

Hi [Manager's Name],

I hope this message finds you well. I wanted to follow up on the action items discussed during last week's project review meeting.

To ensure we stay on track, here's a quick summary of the pending items:

1. [Action Item 1] - [Brief description of the status or what is needed]
2. [Action Item 2] - [Brief description of the status or what is needed]
3. [Action Item 3] - [Brief description of the status or what is needed]

Please let me know if there are any updates or if we need to discuss anything further. I appreciate your guidance on these points.

Thank you!

Best regards,

Requirement: Architecture & Router/Dispatcher Wiring Evidence

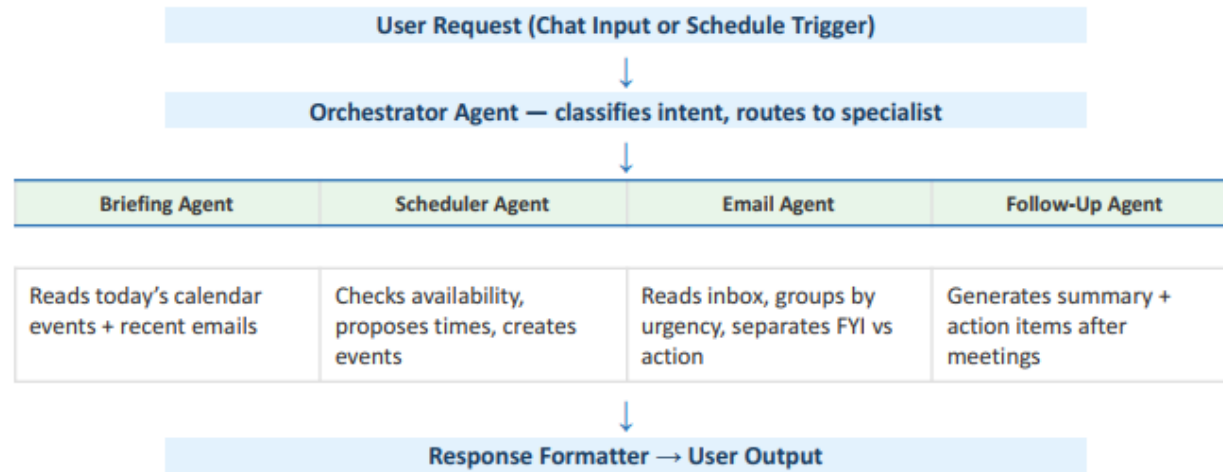

Screenshot 17 of 51

Requirement: Architecture & Router/Dispatcher Wiring Evidence

Screenshot 18 of 51

This is a reference architecture. You are free to design your own. Your submission must include your own architecture diagram.

Possible Agents

Agent	Role
Orchestrator	Routes user requests to the right specialist based on intent
Briefing Agent	Pulls calendar events and emails, generates daily summary with conflicts
Scheduler Agent	Checks availability, proposes slots, creates events with Google Meet links
Email Agent	Reads and summarizes unread emails, groups by urgency/topic
Follow-Up Agent	After meetings, generates action items and sends summaries to attendees

You may combine, split, or rename agents. You may use fewer or more agents than shown above.

What CalendarMate Should Be Able to Do

CalendarMate — AI-Powered Productivity Assistant

Multi-agent assistant that collapses a PM/TPM's ~2 hrs/day of meeting logistics, scheduling, and email triage. Built as a **single Langflow flow** with a Router orchestrator over four specialist agents, grounded in live Google Calendar + Gmail data, instrumented end-to-end with **Langfuse**.

Capstone: *Applied Agentic AI for PMs/TPMs — CalendarMate.*

Requirement: Langfuse Metrics, Observability & Submission Evidence

Screenshot 48 of 51

Requirement: Langfuse Metrics, Observability & Submission Evidence

Screenshot 49 of 51

The screenshot displays the Langfuse Tracing interface. The top navigation bar includes the Langfuse logo, organization name 'mahesh's Organization', and project name 'Hobby'. The main header shows 'Tracing' with a 'New data in ~15 min' indicator. Below this is a search bar and a 'Ask AI' button. The interface is divided into three main sections: a left sidebar, a top filter bar, and a main table area.

Left Sidebar: Contains navigation links for Home, Dashboards, Observability, Tracing (selected), Sessions, Users, Alerts, Prompt Management, Prompts, Playground, Evaluation, Scores, Evaluators, Human Annotation, Datasets, Experiments, Action required, Upgrade Plan, Settings, Book a call, and Support.

Top Filter Bar: Includes filters for Quality, Slow, Cost, and My Views. It also has a 'Table' view selector and a 'Columns' dropdown showing 16/34 columns.

Main Table: Displays a list of traces with columns: Start Time, Type, Name, Trace Name, Input, Output, Metadata, and Status. The table is filtered by 'Is Root Observation' (True/False) and 'Name' (LangGraph, ChatOpenAI, etc.). A 'Count' bar chart is visible above the table.

Bottom Bar: Shows the total count 'Total ≈ 1.07K', 'Rows per page' (50), and 'Page 1'.

Requirement: Langfuse Metrics, Observability & Submission Evidence

Screenshot 50 of 51

The screenshot displays the Langfuse web interface for a project named 'mahesh's Organization Hobby'. The left sidebar contains navigation links for Home, Dashboards, Observability, Tracing, Sessions, Users, Alerts, Prompt Management, Prompts, Playground, Evaluation, Scores, Evaluators, Human Annotation, Datasets, Experiments, Upgrade Plan, Settings, Book a call, and Support. The main area is divided into three panels:

- Tracing Panel:** Shows a search bar with filters for Quality, Slow, Cost, and My Views. A table lists traces with columns for Start Time, Type, Name, and Trace Name. The table is filtered by 'Is Root Observation' and 'Name'.
- Trace Detail Panel:** Displays a detailed view of a trace titled 'LangGraph: 3cca0b5dc0143c18df3d26b41e61d66f'. It shows a flowchart of the trace steps, including 'LangGraph', 'Mock Calendar Tool', 'Chat Input', 'Mock Gmail Tool', 'Route: Scheduler', 'Route: Follow-Up', 'Route: Email', 'Agent', 'ModelCallLimitMiddleware.before_model', 'model', and 'ChatOpenAI'.
- ChatOpenAI Panel:** Shows the chat history for the selected trace. It includes a system prompt, a user message, and an assistant response. The assistant response states: 'The meeting has been successfully scheduled for **September 15, 2026, at 10:00 AM.** Here are the details:
 - Meeting:** AWS Cloud S3 Service Activation
 - Date & Time:** September 15, 2026, at 10:00 AM (UTC)
 - Attendees:** support@tabexp.com and Rashmi Shetty
 - Google Meet Link:** meet.google.com/mock-link-123 If you need anything else, feel free to let me know!'

Requirement: Langfuse Metrics, Observability & Submission Evidence

Screenshot 51 of 51

The screenshot displays the Langfuse web interface for a project named 'mahesh's Organization Hobby'. The interface is divided into several sections:

- Tracing Section:** Includes a search bar, filters (Quality, Slow, Cost, My Views), and a table of traces. The table has columns for Start Time, Type, Name, and Trace Name. A bar chart shows the distribution of traces over time.
- Trace Detail View:** Shows a specific trace for 'LangGraph: 3cca0b5dc0143c18df3d26b41e61d66f'. It includes a search bar, a list of steps (e.g., Chat Input, Mock Gmail Tool, Route: Scheduler), and a graph showing the flow of the trace.
- ChatOpenAI Section:** Displays the chat history for the selected trace, including the user's input and the assistant's response. The assistant's response is a detailed scheduling confirmation for September 15, 2026, at 10:00 AM.

The chat history shows the following interaction:

User: yes

Assistant: The meeting has been successfully scheduled for **September 15, 2026, at 10:00 AM**. Here are the details:
